

WALL TIE BRACKETS

Wall Tie Bracket secured in the wall 10" – 12" down from the top of standard.

Below left – Wall Tie Bracket.
Below right – picture shows how the wall tie bracket should be placed in the standard (center or end) when securing the gondola unit

TOP CAP ANCHORING BRACKET

Top Cap Anchoring Bracket – Start at one end of top cap and slide bracket on top cap as in above picture.

Slide the bracket along the top cap until desired position is located.

Use the holes in the bracket to secure gondola unit to the wall. *

These pictures are to be used as a guide only please refer to factory assembly instructions for construction of gondola units.

* End user to provide fasteners to secure wall tie bracket and/or top cap anchoring bracket to wall.
